EDUCATION

Bachelor of Mathematics in Computer Mathematics
Carleton University

Ottawa, ON
2021 - 2026

EXPERIENCE

New Technology Introduction Intern
Canadian Air Transport Security Authority

May – Sep 2024, May – Sep 2025
Ottawa, ON

- Performed exploratory data analysis and applied statistical methods on operational performance data from new software deployments, delivering detailed reports and data-driven recommendations to stakeholders and senior management to support evaluation and decision-making.
- Engineered Power BI data models and automated reporting pipelines, reducing data-to-insight latency from days to near real-time across all Canadian airports.
- Supported testing/evaluation activities on CATSA Plus lanes including lab testing and in the field on newly deployed CT X-rays, capturing operational metrics to evaluate performance against acceptance criteria.

Software Engineering Intern
DUBS Advising Inc.

Jan – May 2023
Ottawa, ON

- Built user-facing web workflows and integrated a PayPal payment gateway on a Node.js backend, enabling secure end-to-end online transaction processing.
- Developed responsive front-end components in React, implementing reusable UI patterns and client-side state management to support iterative feature delivery and troubleshooting in a collaborative development environment.

Software Engineering Intern
Carleton University Office of Institutional Research and Planning

May – Sep 2021
Ottawa, ON

- Refactored and enhanced reporting capabilities from legacy PHP scripts to Python, optimizing queries against MySQL and Oracle databases to improve report accuracy, runtime performance, and end-user experience.
- Designed and implemented an automated reporting tool for the student experience questionnaire, aggregating survey data and generating summary statistics to surface actionable insights for improving teaching and learning outcomes.
- Enhanced ETL pipelines using SQL and Airflow to improve data quality, throughput, and reliability ahead of downstream reporting and analytics.

CERTIFICATIONS

Machine Learning Specialization: Regression, Classification, Neural Networks and Decision Trees (DeepLearning.ai)
Open Source Data Engineering: Building Automated Data Pipelines with Spark, dbt, and Airflow (Coursera)
RAG for Generative AI Applications Specialization: RAG, vector databases, advanced retrieval tools (IBM)
Claude Code in Action: Claude Code (Anthropic)
Government Security Clearance: Secret

TECHNICAL SKILLS

Programming Languages: Java, Python, C/C++, SQL, R
Business Intelligence: Power BI, ETL, Spark, Airflow, DBT
Tools: Claude Code, Github, Jupyter Notebooks, Visual Studio Code, RStudio, MATLAB, Microsoft Excel, Node.js
Libraries: Pandas, Numpy, Scikit-Learn, Tensorflow, Matplotlib, Seaborn, React
GenAI / RAG: LangChain, LlamaIndex, ChromaDB, FAISS

LANGUAGES

English: Native proficiency **Spanish:** Native proficiency **French:** Intermediate proficiency

VOLUNTEER EXPERIENCE

Varsity Athlete

Carleton University Varsity Water Polo Team — Captain

Ottawa, ON

- Led teammates in a high-performance environment; strengthened communication, discipline, and accountability
- Maintained composure and performance under pressure, including championship-level competition

NLS Certified Water Polo Coach

Ottawa Titans Water Polo

Ottawa, ON

- Coached U12 water polo, taught children how to develop swimming and water polo skills
- Communicated clearly with parents and guardians while supporting a safe, well-supervised aquatic environment, leveraging CPR and First Aid training to ensure children's well-being.
